

# Arnhem Sofa

Modular Couch

Designer

Sebastian Herkner

The modular Arnhem Sofa is designed to be multifunctional and converted in any look. With four different heights and fully upholstered reversible cushions the Arnhem Sofa enables a broad range of applications.

## Specifications

Body  
Plywood, High Resilience Foam  
and Fabric

Legs  
Solid oak or ash, Black, Grey

## Ingredients

Beech plywood

Ash or oak legs

Electro galvanised hanger bolts

High Resilience Foam

Fabric

Felt gliders

## Modular

The modular thought behind the design enables a broad range of applications. It is very suitable as a multifunctional workspace, in which one can concentrate and enjoy some privacy, as well as a meeting place or waiting area.

Special about the Arnhem Sofa is that its side and backrests are horizontal stackable which means they can be attached in three different heights and therefore enable the application as an open community seat as well as an enclosed room-in-room space.

## Bespoke option

### Customize the colour of the legs

When ordering a minimum of 5 Arnhem Sofas of the same design, the colour of the legs can be customized.

## We create interior products by today's standards.

De Vorm is established in a new era, we develop products by the standards of today. This means we produce efficiently, use the full lifecycle of products and eventually give them a new life.

Our emphasis lies on making a product that works, by setting a variety of conditions; it should be legible, accessible, but also environmental friendly and aesthetically perfectly in balance.

## We like a product because of its functionality.

A good product makes life easier - it should be developed for helping us function better throughout the day. We firmly believe that the beauty of a design lies in the sum of functions that makes it a complete product.

## We continuously raise the bar.

From the very first sketches we start combining and developing new techniques to find new possibilities to innovate. Our design process is infused with technical development; techniques result in aesthetic features and the other way round.
